Proven. Trusted. Value.

Dosing

283mg delivered dose of docusate sodium per 5mL mini-enema.

Indication

Enemeez® and *Enemeez® Plus* mini–enemas penetrate and soften the stool, promoting a bowel movement. The unique formulations function as a stool softening hyper-osmotic laxative by drawing water into the bowel from surrounding body tissues.

Enemeez® Plus contains 20mg of benzocaine, assisting in the anesthetization of the rectum and lower bowel. The formulation was developed for patients who experience painful bowel movements.

Therapeutic Efficacy

- Fast, predictable results typically in **2–15 minutes.**[1]
- Safe, effective, non–irritating formula for bowel care.
- Can virtually eliminate episodes of incontinence.[2]
- No mucosal discharge; helps to maintain healthy skin integrity.[3]
- Easy rectal usage for patients with reflux issues or nausea.
- *Enemeez® Plus* assists with painful bowel movements.

Clinical Comparisons: *Enemeez®* Mini-Enema and Bisacodyl Suppository

Summary: 42% of bisacodyl users experienced at least one episode of incontinence when using a suppository, whereas that number drops significantly, to only 3%, when using *Enemeez®* mini-enemas.

Bisacodyl 42%
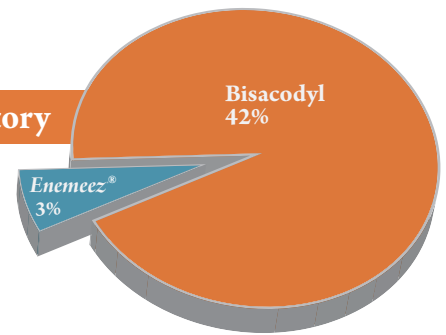

Enemeez® 3%

EPISODES OF INCONTINENCE BY PRODUCT
Enemeez® vs Bisacodyl Study for Formulary Addition of Enemeez®. California SCI Model System. 10.22.10

Bisacodyl 74.5 Minutes

Enemeez® 37 Minutes
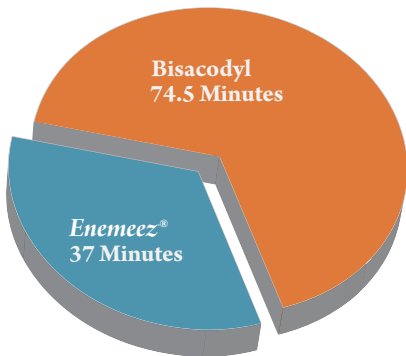

Summary: Study supported that patients using the **docusate sodium mini-enema** had a bowel movement almost **twice as fast as patients using a bisacodyl suppository. Time from flatus to total transfer of patient.**

Clinical Pharmacoeconomics

What does an ineffective bowel care protocol cost your facility?

1. The total annual labor and supply cost in 2002 per long term care resident with constipation was $2,253. *[4]
   *Today's cost would be substantially more.

2. 46% of long-term care residents experience fecal incontinence on a regular basis.[5]

3. The mean time spent each day dealing with incontinence was 52.5 minutes per patient or $27.19 per day, per patient.[4]

The total annual cost of incontinence per patient was $16,976.
